

## Information Technology Policy

ZMI's management information environment is comprised largely of proprietary computer hardware and software systems, complemented by tailor-made software solutions, which address the Company's particular operating requirements.

It is the Company's policy that all information should be treated as being of the highest confidentiality and available only to the Company's employees. Particular emphasis is placed on the confidentiality of Client information. Accordingly, access to the Company's information data base is strictly controlled.

In order to achieve these aims, ZMI has put in place security and back-up systems, which demonstrate the Company's commitment to the preservation of its information technology systems and data.
